

Lampiran

1. Source Code Login:

```
private void tblLoginActionPerformed(java.awt.event.ActionEvent evt) {
    String user = "septian";
    String pass = "1993";
    if (user.equalsIgnoreCase(txtuser.getText()) &
        pass.equalsIgnoreCase(txtPass.getText())) {
        this.setVisible(false);
        new menu().setVisible(true);
    } else {
        javax.swing.JOptionPane.showMessageDialog(null, "kombinasi nama dan password
salah");
        txtuser.setText("");
        txtuser.requestFocus();
        txtPass.setText("");
    }
}
```

2. Source Code Menu Utama:

```
private void jButton1ActionPerformed(java.awt.event.ActionEvent evt) {
    new penduduk().setVisible(true);    // TODO add your handling code here:
}
private void jButton2ActionPerformed(java.awt.event.ActionEvent evt) {
    new lahir().setVisible(true);    // TODO add your handling code here:
}

private void jButton3ActionPerformed(java.awt.event.ActionEvent evt) {
    new mati().setVisible(true);    // TODO add your handling code here:
}
private void jButton4ActionPerformed(java.awt.event.ActionEvent evt) {
    new mutasi_keluar().setVisible(true);    // TODO add your handling code here:
}
private void jButton5ActionPerformed(java.awt.event.ActionEvent evt) {
    new kk_sejahtera().setVisible(true);    // TODO add your handling code here:
}
private void jButton6ActionPerformed(java.awt.event.ActionEvent evt) {
    new mutasi_keluar_2().setVisible(true);    // TODO add your handling code here:
}
private void jMenuItem6ActionPerformed(java.awt.event.ActionEvent evt) {
    new mutasi_keluar_1().setVisible(true);    // TODO add your handling code here:
}
}
```

3. Source Code Menu Penduduk:

```
public class penduduk extends javax.swing.JFrame {
    public Connection con;
    public void koneksi()
}
```

```

try
    Class.forName("com.mysql.jdbc.Driver");
con=DriverManager.getConnection("jdbc:mysql://localhost:3306/apldesa","root","");
    LbStatus.setText("TERKONEKSI");
}
catch (Exception e)
    LbStatus.setText("DATABASE TIDAK TERHUBUNG");
* Creates new form penduduk
*/
public penduduk() {
    initComponents();
    koneksi();
    this.setExtendedState(JFrame.MAXIMIZED_BOTH);
}

```

4. *Source Code* Menu Kelahiran:

```

public class lahir extends javax.swing.JFrame {
    public Connection con;
    public void koneksi()
    try
        Class.forName("com.mysql.jdbc.Driver");
con=DriverManager.getConnection("jdbc:mysql://localhost:3306/apldesa","root","");
        LbStatus.setText("TERKONEKSI");
        catch (Exception e)
            LbStatus.setText("DATABASE TIDAK TERHUBUNG");
* Creates new form lahir
*/
public lahir() {
    initComponents();
    koneksi();
    this.setExtendedState(JFrame.MAXIMIZED_BOTH);
}
}

```

5. *Soure code* Menu Kematian:

```

public class mati extends javax.swing.JFrame {
    public Connection con;
    public void koneksi()
    try
        Class.forName("com.mysql.jdbc.Driver");
con=DriverManager.getConnection("jdbc:mysql://localhost:3306/apldesa1","root","");
        Lblmati.setText("TERKONEKSI");
        catch (Exception e)
            Lblmati.setText("DATABASE TIDAK TERHUBUNG");
* Creates new form mati
*/
public mati() {
    initComponents();
    koneksi();
    this.setExtendedState(JFrame.MAXIMIZED_BOTH);
}
}

```

6. *Source Code* Menu Mutasi Keluar:

```
public class mutasi_keluar extends javax.swing.JFrame {
    public Connection con;
    public void koneksi()
        try
            Class.forName("com.mysql.jdbc.Driver");
            con=DriverManager.getConnection("jdbc:mysql://localhost:3306/apldesa
            ", "root", "");
            LbMutasi.setText("TERKONEKSI");
            catch (Exception e)
            LbMutasi.setText("DATABASE TIDAK TERHUBUNG");
            * Creates new form mutasi_kelua
    }
```

7. *Source Code* Nenu KK Sejahtera:

```
public class kk_sejahtera extends javax.swing.JFrame {
    public Connection con;
    public void koneksi()
        try
            Class.forName("com.mysql.jdbc.Driver");
            con=DriverManager.getConnection("jdbc:mysql://localhost:3306/apldesa", "root", "");
            LbKk.setText("TERKONEKSI");
            catch (Exception e)
            LbKk.setText("DATABASE TIDAK TERHUBUNG");
            * Creates new form kk_sejahtera
            */
    public kk_sejahtera() {
        initComponents();
        koneksi();
        this.setExtendedState(JFrame.MAXIMIZED_BOTH);
    }
```

8. *Source Code* Menu Surat Masuk:

```
public class mutasi_keluar_2 extends javax.swing.JFrame {

    public Connection con;

    public void koneksi()

        Class.forName("com.mysql.jdbc.Driver");

    con=DriverManager.getConnection("jdbc:mysql://localhost:3306/apldesa", "root", "");

    LbMutasi.setText("TERKONEKSI");
```

```
catch (Exception e)
    LbMutasi.setText("DATABASE TIDAK TERHUBUNG");
public mutasi_keluar_2() {
    initComponents();
    koneksi();
    this.setExtendedState(JFrame.MAXIMIZED_BOTH);
}
```

9. *Source Code* Menu Surat Keluar:

```
public class mutasi_keluar_1 extends javax.swing.JFrame {
    public Connection con;
    public void koneksi()
    try
        Class.forName("com.mysql.jdbc.Driver")
        con=DriverManager.getConnection("jdbc:mysql://localhost:3306/apldesa","root","");
        LbMutasi_1.setText("TERKONEKSI")
    catch (Exception e)
        LbMutasi_1.setText("DATABASE TIDAK TERHUBUNG");
    public mutasi_keluar_1() {
        initComponents();
        koneksi();
        this.setExtendedState(JFrame.MAXIMIZED_BOTH);
    }
}
```
