Pembuatan GUI Matlab

```
function varargout = konversi_biner(varargin)
% KONVERSI_BINER M-file for konversi_biner.fig
%     KONVERSI_BINER, by itself, creates a new KONVERSI_BINER or
% raises the existing
%     singleton*.
%
%     H = KONVERSI_BINER returns the handle to a new
KONVERSI_BINER or the handle to
%     the existing singleton*.
%
%     KONVERSI_BINER('CALLBACK',hObject,eventData,handles,...)
calls the local
%     function named CALLBACK in KONVERSI_BINER.M with the given
input arguments.
%
%     KONVERSI_BINER('Property','Value',...) creates a new
KONVERSI_BINER or raises the
%     existing singleton*. Starting from the left, property
value pairs are
%     applied to the GUI before konversi_biner_OpeningFcn gets
called. An
%     unrecognized property name or invalid value makes property
application
%     stop. All inputs are passed to konversi_biner_OpeningFcn
via varargin.
%
%     *See GUI Options on GUIDE's Tools menu. Choose "GUI allows
only one
%     instance to run (singleton)".
%
